MANAGED. HIRING. MODEL.

 1. CITE YOUR TEAM NEEDS

 2. WE HELP MAP TALENTS

 3. REVIEW THEIR PROFILES

 4. INTERVIEW & SHORTLIST

 5. CONFIRM YOUR HIRE

 6. ASSIGN & TRACK TASKS

 7. GET DAILY SUMMARY

 8. LEVERAGE NO OBLIGATION HIRING

TIME & MATERIAL

1 EXAMINE YOUR REQUIREMENT

2 DEFINE AND PLAN SCOPE OF WORK

3 DEPLOY THE RIGHT TALENT MIX

4 CONFIRM THE DELIVERABLES

5 CHOOSE THE HOURLY BLOCK, THAT BEFITS YOUR NEED.

7 GO LIVE

6 DEVELOP CONFIRMED MATERIALS, WITH TIMELY REPORTS.

ENGAGEMENT MODEL

FIXED. COST. MODE.

STEP 1

Requirement discovery.

STEP 2

Finalizing the scope of work.

STEP 3

Proposal creation including project specification

STEP 4

Proposal Submission
Cost & Timeline.

STEP 5

Project confirmation with a work agreement.

STEP 6

Team Introduction & Development Planning.

STEP 7

Timely Update through weekly/ bi-weekly calls.

STEP 8

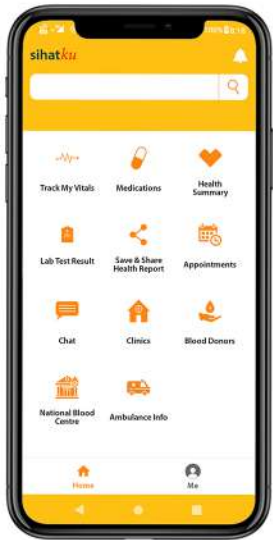

QA, Testing and effective Project Management.

STEP 9

Deployment and Go Live.

HEALTH CARE

APP

OVERVIEW

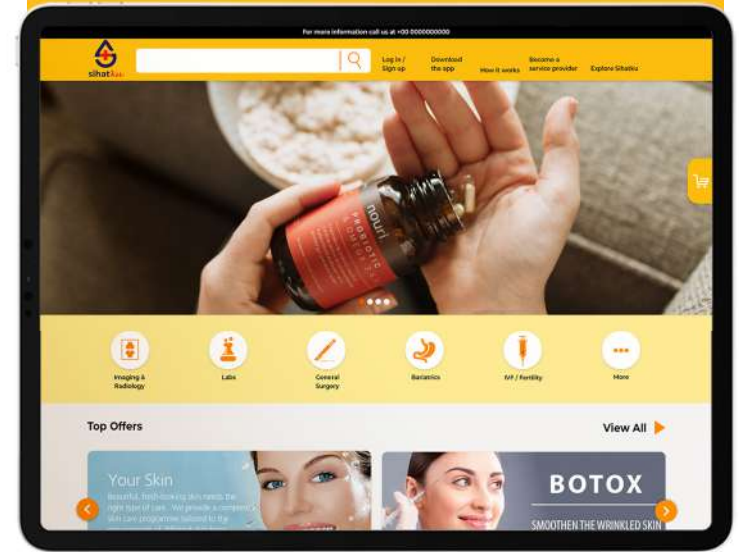

The project has two parts - Health Tracking and Marketplace. Health Tracking allows users of Malaysia to track and maintain their daily health records, reach out to nearby clinics and participate in blood donation. Marketplace is an ecommerce front for medical procedures where Admin gets in touch with multiple service centers which are looking for a platform to sell their services.

SOLUTION

- iOS Mobile Application for customers
- Android Mobile Application for customers
- Website for customers
- Website for service providers
- Admin Panel

TECH STACK

Android - Java
iOS - Objective C
Website - Angular
Backend - ASP.Net
Windows | MsSQL

EMERGENCY

APP

OVERVIEW

This is a utility application that serves multiple purposes such as - helps to connect with families on Emergencies Apps, helps user stay protected from unauthorized phone access by clicking the picture of the person who wrongly attempts to unlock your device, enables theft detection, proximity detection, charger detection, sim tracker, app locker, and can safeguard the mobile against unknown viruses.

SOLUTION

- Android Mobile Application
- Admin Panel

TECH STACK

- Android - Java
- Backend - PHP

- Database- My SQL

SOME OF OUR PROJECTS

GRANTS APPLICATION TRACKING

SYSTEM

SOLUTION

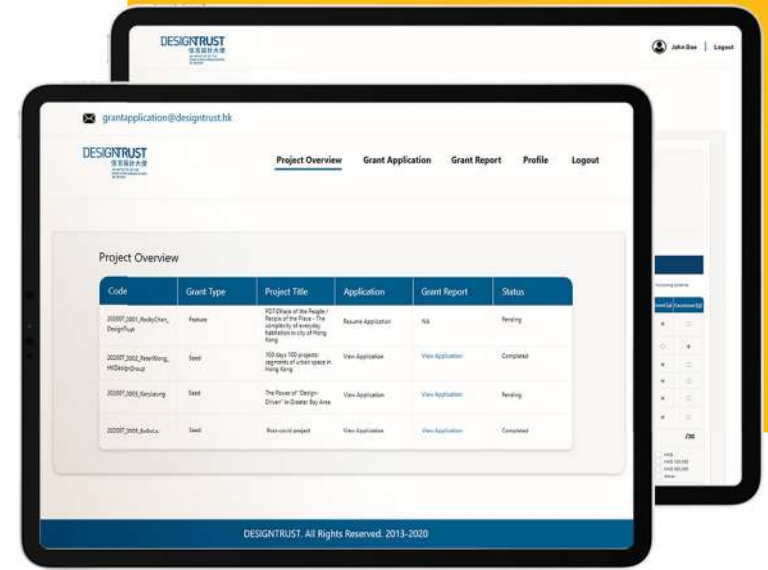

- Website for Grantees
- Website for Vettors
- Admin Panel for the Trust

TECH STACK

- Frontend - Bootstrap
- Backend - PHP | Laravel
- Apache | Linux
- Database- PostgreSQL

OVERVIEW

This system is prepared to apply | scrutinize and approve GRANTS for one of the countries in the APAC region. It works in an environment, which is managed by both semi-government and government personnel for the welfare of their people.

STREAMING APPLICATION FOR KIDS

OVERVIEW

The Application is aimed to provide video content through streaming for kids, where parents can create and manage profiles for their kids. Parents, in turn, can upload video content on the platform and also add multiple sub profiles under them, for their kids, to watch videos related to their specific age.

SOLUTION

- Website for Kids and Parents
- iOS App and Android App
- Admin Panel for the business

TECH STACK

- Website - Angular
- iOS - Swift | Android - Kotlin
- Back-end - PHP | Laravel
- Database - MySQL

LEARNING MANAGEMENT SYSTEM

SOLUTION

iOS & Android Mobile Application for :
- Student | Parent
- Teachers | Principal
- Tutor | Admin

TECH STACK

Android - Hybrid
iOS - Hybrid
Website - Angular
Backend - Laravel
Apache | MySQL

OVERVIEW

A learning management system (LMS) is a software application for the administration, documentation, tracking, reporting and delivery of e-learning education courses or training programs in schools and in private coaching mode.

HOME BAKERS APP

OVERVIEW

The main propose of this project is to professionalize individual Confectionary Professionals business. The app has two parts - cooks can analyse and set up their confectionary business; and an e-commerce section to buy and sell cakes and candies.

SOLUTION

- Android Mobile App for sellers & buyers
- iOS Mobile App for sellers & buyers
- Admin Panel for Tech and Food

TECH STACK

Android - React Native
iOS - React Native
Backend - PHP
Apache | MongoDB

BUSINESS DIRECTORY APP

OVERVIEW

This web and mobile app is to facilitate people and businesses to find each other through the application. The concept is on the Business Directory side with a personalized touch, to ensure higher efficiency in terms of search results. This has many smart TAGs, which makes a user search for businesses, and contact them through the app.

SOLUTION

- iOS App for User & Business
- Android App for User & business
- Website for User & business owners
- Admin Panel

TECH STACK

- Android - Kotlin
- iOS - Swift
- Website - Angular
- Backend - ASP.Net
- Database - MsSQL

BUSINESS BRANDING WEBSITE

OVERVIEW

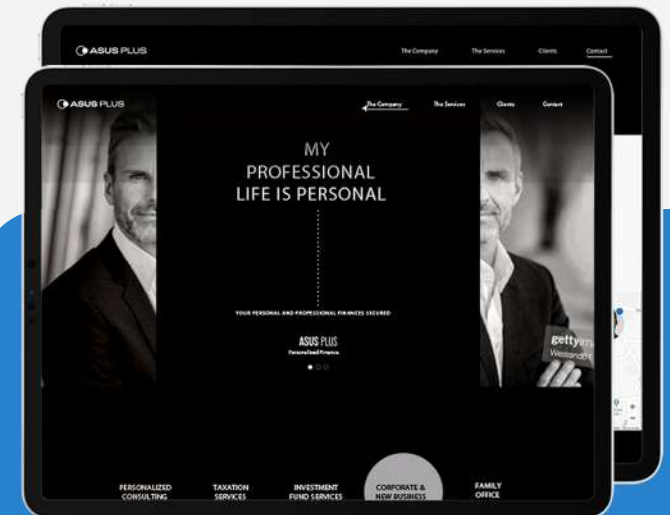

This Project is for an agency, who was looking to re-establish their brand by revamping their Corporate website. The sole intent behind the face-lift was to exhibit the new stream of financial services the firm introduced. As their tech partner, we advised on a very simple solution, which they cherish as it served their purpose.

SOLUTION

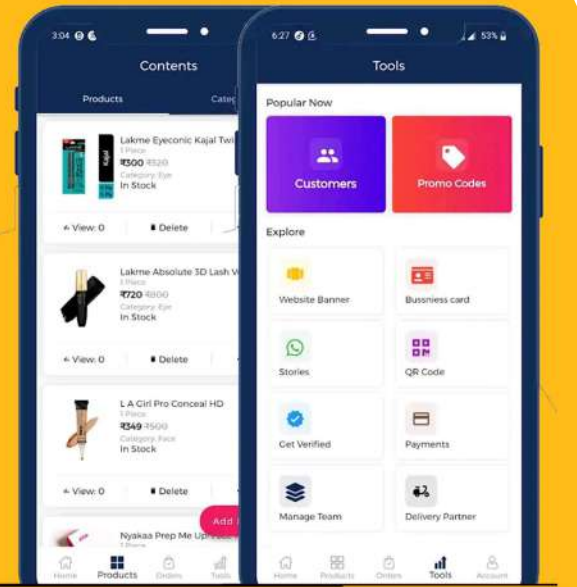

- Responsive Website
- Photo scaling
- Smart javascript

TECH STACK

- Bootstrap | JS
- PHP | Wordpress
- Apache | MySQL
- AWS

PERSONALIZED E-COMMERCE APPLICATION

OVERVIEW

This application targets two kinds of users - Small / medium sized business owners who aspire to build their own e-commerce platform; and Customers who prefer shopping from the private stores of individual businesses. Business Owners can personalize ready-made catalogues, banners, business cards and promo codes for their stores.

SOLUTION

- Android Mobile Application for Business Owners
- Android Mobile Application for Customers
- iOS Mobile Application for Business Owners
- iOS Mobile Application for Customers
- Website for Customers
- Website for Business Owners
- Admin Panel

TECH STACK

- Android – Kotlin
- iOS – Swift
- Website – Angular
- Backend – Python Django
- Linux | MySQL

SOLUTION

- Android Mobile Application for Passengers
- Android Mobile Application for Drivers
- iOS Mobile Application for Passengers
- iOS Mobile Application for Drivers
- Promotional Website
- Admin Panel

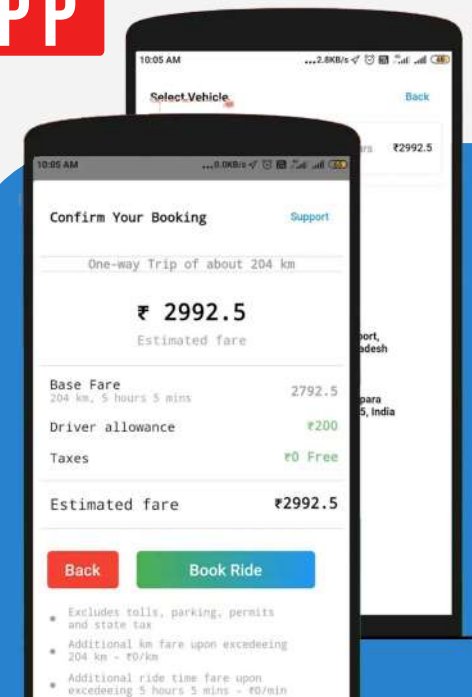

TECH STACK

- Android – Kotlin
- iOS – Swift
- Website – Angular
- Backend – PHP Laravel
- Linux | MySQL

OVERVIEW

The application allows users to book taxis online, and track their cab's real time location. Passengers can choose a pick up point and a drop point for local or inter-city travels. Booking requests are sent to verified drivers who can provide the requested cab service. The application supports both online and offline payments.

CAB BOOKING APP

MINI-TRUCK BOOKING APP

OVERVIEW

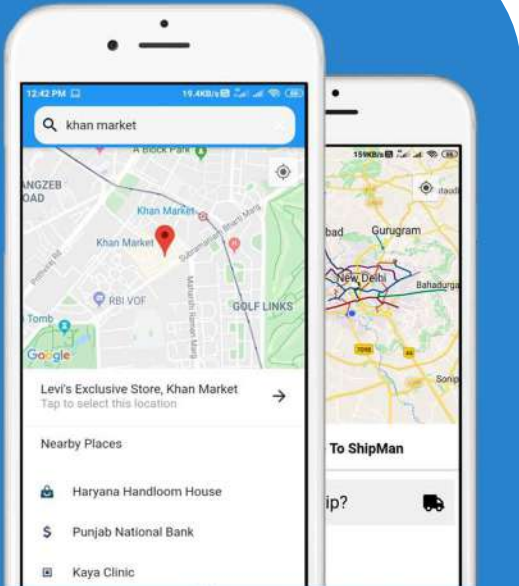

The application provides a platform for users to book mini-trucks and arrange inter-city and intra-city transport of goods in bulk. Powered by an end-to-end logistics system and extensive analytics, this application provides an efficient and automated operation for a Supply Chain Management organization.

HASSLE FREE DOCUMENT MANAGEMENT SYSTEM

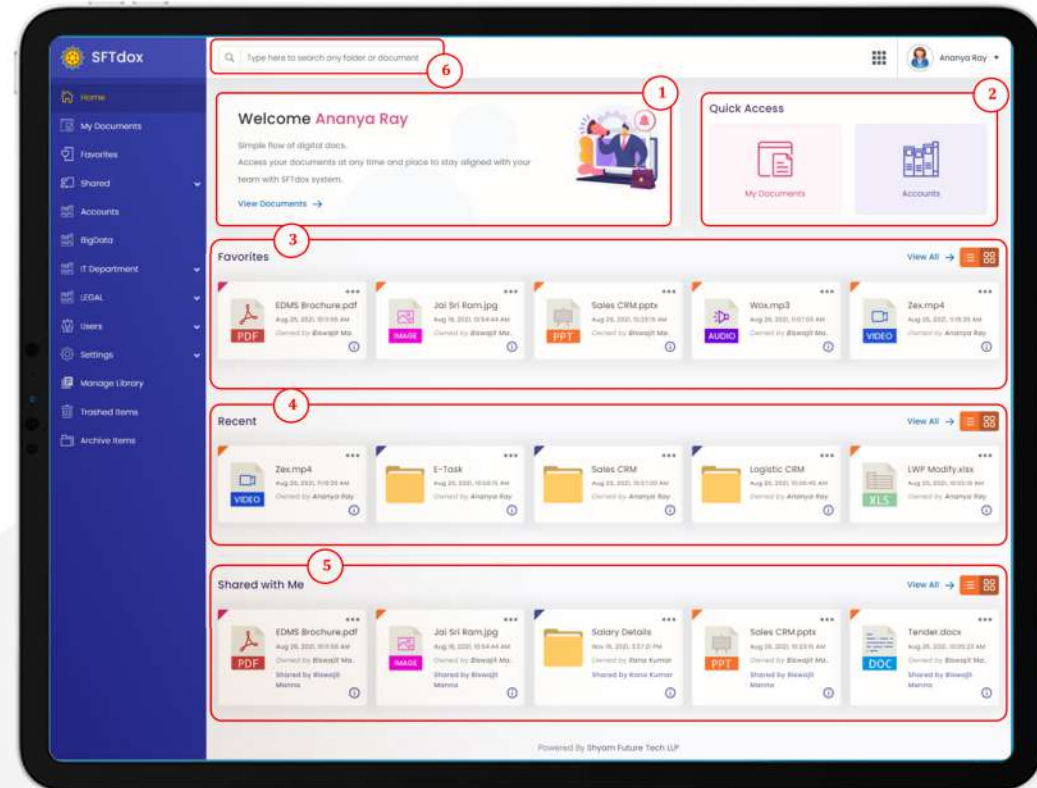

OVERVIEW

Regular business activities produce a large volume of business data – business strategies, statistics, contracts, policies, and other crucial documents that are highly sensitive. The document management software enables you to store and share them with respective stakeholders through a secured channel ensuring its security and ease of sharing.

Data security is a top priority now because data is the new oil, and the world is after it. It is the foundation for effective business strategies. Threat to enterprise data is more now than
